

The University intranet

Abdikarimova Dariga
Adilbek Abylaikhan

What we have done?

- Login as admin and work (add, delete, change data, view all actions of Users)
- Login as User and choose User type, every type has its own limited opportunities.
- Every User can
 - Bonus: read news
 - leave comments
- Student can
 - register to courses (if it is contain in DB and has registered teacher)
 - see marks, transcript
 - read course files
 - read info about every teacher by login

What we have done

- Teacher can:
 - Read messages by OR Manager
 - Send orders to Executor and OR Manager
 - Put Marks(separately: 1st att, 2nd att, final)
 - Add course files
 - Get info about student by login
- TechSupport can:
 - Work with orders (view all orders, change status, set responsibility, complete the order)
- OR Manager can:
 - Send Message to teacher
 - add news
 - add new course to DB
 - View students/teachers by some filters

What we do not implement?

- Admin can't update some fields
- OrManager add course, but not specifying for which faculty...
